

Install REES46 Shopify Application

1. Install the REES46 application from Shopify AppStore: <https://apps.shopify.com/rees46-e-commerce-marketing-platform>

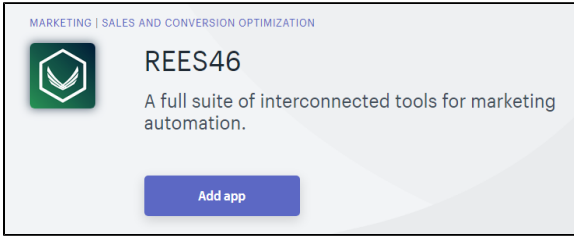

Table of Contents

2. Create a new REES46 account or bind the store to an existing account using the user's public and private keys.

Step 1 of 2: Create a new or bind existing REES46 account

Before we begin, you need to create a new or bind existing REES46 account.

Enter REES46 login email

Enter an email to create a new REES46 account or your existing REES46 login email to bind accounts.

Note! There is no need to create a new REES46 account if it was created earlier. Use your REES46 login email and the API key fields below to bind accounts.

Create new REES46 account using the entered email

— OR —

Enter REES46 customer's public API key

Enter REES46 customer's secret API key

Enter the REES46 customer's API keys

Note! No need to use your passwords or Store API keys here. You can find the necessary customer's keys in the REES46 account settings by following the link — <https://app.rees46.com/customers/edit>

The keys are here: **REES46 account** -> **Main Menu** -> **Settings** -> **Account Settings**

Bind existing REES46 account

Please [contact us](#) in case of any problems.

If an account with the email already exists, the application will ask to enter public and private keys. The keys are available in REES46 account settings: <https://app.rees46.com/customers/edit>

Please note

The customer's keys and the store's keys are different keys, and in this case, it is necessary to use the customer's keys.

Step 1 of 2: Create a new or bind existing REES46 account

Before we begin, you need to create a new or bind existing REES46 account.

support@rees46.com
Enter an email to create a new REES46 account or your existing REES46 login email to bind accounts.

The email address was already registered earlier. Please [sign in](#) to REES46 and use the customer API key and secret key to continue binding your accounts.

The keys are here: **REES46 account -> Main Menu -> Settings -> Account Settings**

Enter REES46 customer's public API key

Enter REES46 customer's secret API key
Enter the REES46 customer's API keys

Bind existing REES46 account

Please [contact us](#) in case of any problems.

Step 1 of 2: Create a new or bind existing REES46 account

Before we begin, you need to create a new or bind existing REES46 account.

support@rees46.com
Enter an email to create a new REES46 account or your existing REES46 login email to bind accounts.

0eb0bfd2634a2ccbc60f3fbb070be67b
06e54640e3dd87a54f0cecf183de40
Enter the REES46 customer's API keys

Note! No need to use your passwords or Store API keys here. You can find the necessary customer's keys in the REES46 account settings by following the link — <https://app.rees46.com/customers/edit>

The keys are here: **REES46 account -> Main Menu -> Settings -> Account Settings**

Bind existing REES46 account

Please [contact us](#) in case of any problems.

3. If you have already added the store to your account, select it from the list offered.

Step 2 of 2: Bind your stores

Before we proceed, you need to bind your Shopify store **rees46.myshopify.com** to the store in your REES46 account:

my Shopify store

Please [contact us](#) in case of any problems.

4. On the success page follow the instructions to speed up the activation of the tools: see a product, add the product to the cart, and complete the purchase. These actions will allow the system to understand the application installation was correct.

Congratulations!

Your store **rees46.myshopify.com** has been successfully connected to REES46.

IMPORTANT: product recommendations require some on-site activity to start working. You can wait for your customers to start it or speed up the process.

To speed up the process, go through these steps:
(These steps enable REES46 to process the key data for product recommendations)

1. Open a new tab
2. Visit a product detail page
3. Add a product to the cart
4. Make a test purchase

After that you can add recommendation blocks to your site or test other REES46 functions.

Visit REES46 Dashboard

Note! You can set up additional features following our [Shopify Integration Guide](#).

Please [contact us](#) in case of any problems.
